

Dnyaneshwar Vidyapeeth's approach towards Finishing school

Now a days because of globalization and rapid technological changes in every sector, there is tremendous gap between academia of Engineering Institutions and expectations of industries from fresh engineering students.

Dnyaneshwar Vidyapeeth established 28 years ago always taking conscious efforts to minimize this gap by our flexible/ industry oriented/ dynamic syllabi and thrust on practical training. Our students are found extremely useful, productive to industrial world.

A step further in the direction, along with our regular courses. We have launched various short term/ industry need based courses for industrial world.

1. We have commenced a course of 7 hours(2 modules) on the topic of “Metrology Measuring Instruments and Usability”.

8 nos modules of this course have been completed in “Turbo Gears India Pvt. Ltd.” (Carraro Group company). They have about 100 nos. of B.Sc. employees. This course and our practical training has definitely changed the confidence level, knowledge of these employees. In fact we will be conducting various courses in Turbo Gears as a part of “Journey of B.Sc. to Engineer”. We are extremely thankful to management of Turbo Gears India Pvt.Ltd for their confidence/faith and cooperation. Because of our training programme attitude, confidence, skills, productivity of employees will be increased and also problem of labour turn over will be reduced to a great extent.

2. City of Pune is changing its face rapidly. With lot of multinationals coming in every sector like Engineering, Automobile, Electronics, Software, etc there is tremendous acceleration of Infrastructural development. Hence construction industry is expanding in a great magnitude. They are also facing shortage of trained/ competent manpower at supervisory level. .

To cater the above problem Dnyaneshwar Vidyapeeth has launched two courses

- 1) Civil Supervisory course of 100 Hrs. duration for 10th passed students.
- 2) Refresher course of 50 Hrs. Duration is for working Civil supervisors in construction industry , (1-2yr. experience)

Both above courses will provide students –employees with new / latest concept in Construction materials, Processes, Constructions equipments, I.S.O., 5 –S Techniques, Safety Management, Estimation / Costing and Wastage Control.

We are happy to state that these courses will be conducted in academic association with READ (Real Estate Academy for Developers) Institute. A term of reference was signed on 10th December 2007. Between Mr. Rajeew Nehru (D.G.READ) and officials of Dnyaneshwar Vidyapeeth .

It is indeed our pleasure to state that first course of 50 Hrs. duration will commence from 20th February for the employees of Kalpataru Properties Pvt. Ltd. In the premise of their Site at Pimple Gurav. We express our gratitude to Col. Sudhir Pande (H.R manager, Kalpataru) for their co-operation and trust in us. We appeal industrial world to get associated with us for need based training in various subjects to make their employees more productive and worthy to accept the challenges of globalization.

S. R. Bokil (Director- Technical Support, Dnyaneshwar Vidypeeth)
